Arva Mada

Undergraduate Computer Engineering Student

Profile

"Aspiring Computer Engineer focused on the intersection of robotics and software. Currently building foundational skills in coding and smart system design at Brawijaya University. Committed to continuous learning and seeking opportunities to apply technical knowledge in practical engineering environments."

Education

SMA Negeri 60 Jakarta | 2024

Brawijaya University | 2025 - Present

Bachelor of Computer Engineering

Technical Skills

Programming Languanges : C++, Python, JavaScript.

Hardware and IoT

3D Design

Projects

IoT-Based Anxiety Relief Board Game | C++, Arduino, ESP32 | Feb 2026

- Designed and built an interactive board game integrated with heart-rate sensors and OLED displays to help manage academic anxiety.
- Developed the game logic using C++ on an ESP32 microcontroller to process real-time physiological data from players.
- Engineered the circuit wiring for multiple sensors (color & heart rate) ensuring stable data transmission and system reliability.

Autonomous Firefighting Robot Prototype | C++, Arduino, Ultrasonic & Flame Sensors | 2024

- Engineered an autonomous robot capable of navigating maze-like environments to detect and extinguish simulated fires.
- Programmed obstacle avoidance and pathfinding algorithms using C++ to ensure safe and efficient maneuvering in hazardous zones.
- Integrated flame sensors and actuator mechanisms (pumps/fans) with an Arduino microcontroller for precise fire detection and rapid response.

Achievement and Experience

- International IoT Olympiad - Silver Medal - 2024
- World Invention Convention and Exhibition (WICE) - Silver Medal - 2024
- LKIR Jakarta - Best Presenter and Most Outstanding Team - 2024

KIR SMA Negeri 60 Jakarta
Robotic Division - Division Lead
Jakarta, Indonesia

Jul 2024 – Mar 2025

ADRESS
Jakarta, Indonesia
